

LEED for Schools Technical Review

Presented by the U.S. Green Building Council

This course is designed to provide a complete review of the LEED® for Schools Rating System™ and how to apply it on school projects including the tools and insights needed to incorporate green building practices into projects. Case studies of certified school projects illustrate successful strategies and practices for improving school design and performance.

LEARNING OBJECTIVES

After completing this course, you will be able to:

- Explain the health, environmental and community benefits of green schools
- Apply the LEED® for Schools Rating System on a project
- Know where to go for additional resources and support

WHO SHOULD ATTEND?

Building industry professionals seeking to increase their understanding of the LEED® for Schools Rating System and green building strategies, benefits and resources.

- Architects
- Designers
- Consultants
- Owners
- Engineers
- Developers
- Contractors
- Manufacturers

LEARNING LEVEL

This is a 300-level course. Consider the *Introduction to LEED for Schools* online course as a preparation.
