

Name: Diana D. Glawe  
Company/Organization: Trinity University,  
Engineering Science  
Department  
Title: Associate Professor  
Chapter Board position: Vice Co-Chair  
Years as a chapter member: Four Years

General overview:

Diana's 20 years of engineering experience span from research in supersonic propulsion to biomimetic nanotechnology. Her interest in sustainable facilities took her to the EPA Headquarters in Washington, DC during her 2007-2008 academic leave from Trinity University. At EPA she worked in the area of sustainable facilities through an American Association for the Advancement of Science (AAAS) Science and Technology Fellowship. Upon returning to San Antonio in 2009 her involvement with USGBC Central Texas –Balcones Chapter has enabled her to promote sustainable buildings and development in the Texas.
