

Name: Erin Zayko, LEED AP BD + C
Company: Lockheed Martin Energy Services
Job Title: Senior Sustainability Manager
Chapter Board Position: Communications Committee Board Liaison
Years as a chapter member: Four years

As a Senior Sustainability Manager for Lockheed Martin IS&GS, Erin works primarily in the field of energy management, supporting municipal, state, federal and private sustainability initiatives. Currently, she supports the Department of Energy's Federal Energy Management program to support federal agencies in meeting the High Performance Sustainable Building Guiding Principles established by EO13423 and EO13514. She works closely with DOE, GSA, and EPA's ENERGY STAR® program to develop and maintain sustainability compliance and reporting tools and regularly trains federal employees in use of EPA's Portfolio Manager, a free energy and water benchmarking tool integrated into LEED® for Existing Buildings Operations and Maintenance. Erin is currently an Austin Community College instructor, working on behalf of Austin Energy to teach commercial users how to benchmark to comply with the City of Austin's Energy Audit Disclosure Ordinance. She supports Lockheed's internal Energy Task Force team and participates in preliminary facility energy audits. She also leads Lockheed Martin's ENERGY STAR labeling initiative, adding greater visibility to the successes associated with Lockheed's Go Green goals.
